

KATADYN EXPEDITION - *the high-performance filter*

PRODUCT CHARACTERISTICS

- Technology: Pump filter, ceramic depth filtration (0,2 microns = 0,0002 mm pores)
- Effect: Eliminates bacteria*, protozoa, cysts*, algae, spores, sediments and viruses in combination with particles greater than 0,2 microns. Reduces radioactive particles.
- Output: Approx. 4 l/min
- Capacity: Up to 100'000 litres depending on the water quality
- Weight: 5,2 kg
- Dimensions: 58 x 20 cm
- Guarantee: 2 year
- Material: Nickel-plated brass, stainless steel, ceramic
- Accessories: Prefilter and carry bag
- Article No.: 2050000
- Series: Endurance

* see testresults on backside

FACTS

- The Expedition makes it easy for large groups to have a drinking water supply.
- Makes carrying large amounts of water (additional weight!) unnecessary in many cases
- Indestructible design
- Particularly used by rafting operators, relief organisations and army troops
- The tried and tested ceramic depth filter removes bacteria, protozoa and other disease-causing agents. The principle: The micro-organisms cannot pass through the mini pores of the filter ceramic (0,2 microns) because of their size (greater than 0,2 microns = 0,0002 mm)
- Unlike disposable filters, the ceramic can be cleaned several times - even in the field

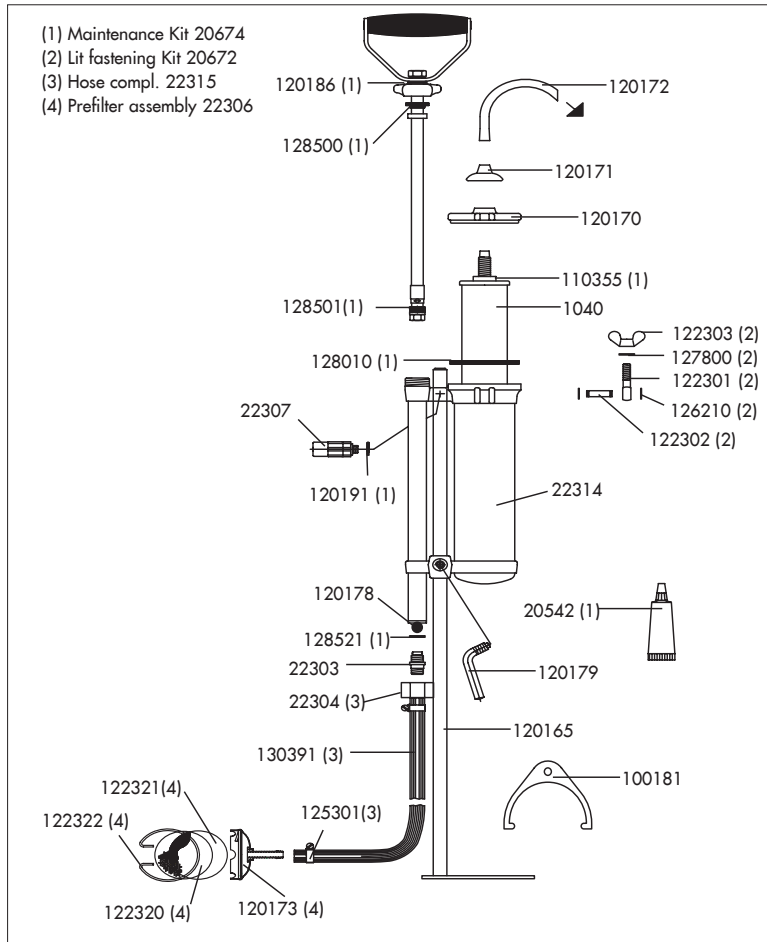

PRODUCT CHARACTERISTICS > BENEFITS

- Filters 4 litres a minute > ideal for groups requiring large amounts of water
- Indestructible material (metal) > extremely long life (up to 100,000 litres!) and very reliable
- Cleanable ceramic filter element > also filters cloudy water / can be used many times (not a disposable filter)
- Few movable parts > simple maintenance
- Measuring gauge supplied > indicates when the filter element should be changed

SHORT PROFILE
The top-performing hand-operated water filter. Rocksolid design. Ideal for large groups of up to 20 people. For rafting, expeditions, base camps, relief organisations
