

KOP302

Programmable battery charger

MAIN FEATURES

- For Lead-acid, NiZn, NiCd, NiMH and lithium batteries
- Fully automatic operation
- Completely programmable
- Up to five charging phases
- Simple to use and program
- Battery monitor and Ah counter
- High precision
- Low noise
- Battery status LED indicators
- Battery temperature compensation

TECHNICAL CHARACTERISTICS

■ Nominal battery voltage	12V	24V
■ Max. output voltage	16,5V	33V
■ Nominal output current	20A	10A
■ Efficiency	87%	88%
■ Peak input current	1,8A	
■ Input voltage	230V $\pm$ 15% 50-60Hz	
■ Dimensions (L x W x H)	222 x 155 x 80mm	
■ Weight	2,1kg
